Education

The International High School of Constanta

High School Diploma, Mathematics and Computer Science

Sept 2018 - Jun 2022

Constanta, Romania

Ovidius University

Second Year, Computer Science

Oct 2022 - Present

Constanta, Romania

Projects

Joke Generator

I developed a Joke Generator web application using React. This application fetches jokes from an external API and displays them to users. I learned about making HTTP requests APIs and how to integrate external data into a web application.

Meal Finder

Developed a dynamic web application called "Meal Finder" using React, as part of personal project. The application's primary function is to help users find meal recipes based on their search queries and integrated user authentication with Firebase.

Certificates

The Complete Web Developer in 2023: Zero to Mastery

Completed a comprehensive web development course covering modern technologies, including React, JavaScript, HTML, CSS, and more.

Developing Front-End Apps with React

Attained proficiency in crafting dynamic, user-friendly web applications using React.
